Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 rejected under 35 U.S.C. 102(e) as being clearly anticipated by Buckley et al (6,064,759).

Buckley et al teach of a method of improving accuracy of method of optically measuring 3-d objects comprising the steps of measuring “the camera error” which is the relationship between the actual pixel locations and the ideal pixel location, determining the measured deviation and taking into account the deviations when calculating the 3-D data (col 26; lines 64 thru col 27; lines 1-6).

Response to Arguments

Applicant’s arguments, see lines 15-19 on page 1 and lines 1-20 on page 2 filed 6/14/03, with respect to the rejection of claim 1 under Aoki et al have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Buckley et al.
